Dear Customer,

Statement of Compliance – California Proposition 65

California proposition 65, known as the California Safe Drinking Water and Toxic Enforcement Act Of 1986, is intended to protect California drinking water sources from chemicals that have the potential to cause cancer, birth defects, or other reproductive harm. The law requires suppliers to identify chemicals from the hazardous chemical list, which is published and periodically updated by OEHHA, and can be accessed at <https://oehha.ca.gov/proposition-65>.

Devar, Inc. is committed to providing quality products to all our customers. Devar manufactures electronic instrumentation for use in the Process Control Industrial market and these units are **not intended for use by consumers**. While we manufacture our instrumentation using other manufacturers components and devices, direct access to information of the chemical composition of those parts is not always available. Proposition 65 does not require warning where the exposure levels pose no significant risk or effect as set forth in the law and regulations. Upon review of the Proposition 65 official list, Devar, Inc. has determined that to the best of our knowledge and belief the products manufactured by Devar, Inc., in their original condition, as shipped from its premises, do not contain any substances at the concentrations that would require a Proposition 65 warning label. Devar believes our industrial products are not harmful when used as intended and properly disposed of at the end of its service life. Although Devar believes the amount of one or more of the listed chemicals is minimal, Devar cannot guarantee that the levels are below the limits required by the State of California. Devar will not be submitting our products to independent testing of the level of every chemical listed in Proposition 65. While not accessible or exposed on any surfaces a user will encounter during normal and proper use, Devar does advise our products contain lead solder on interior printed circuit boards and provides the following warning:

Warning: This product may expose you to chemicals including lead, which is known to the State of California to cause cancer, birth defects, or reproductive harm. For more information, go to www.P65warnings.ca.gov.

Devar, Inc. will continue to monitor the California Office of Environmental Health Hazard Assessment (OEHHA) for any updates and amendments and communicate to customers as necessary.

Sincerely,

Diane L. Billings

Compliance Director
